RE: LGC RFP 23-003 Letter of Introduction

Dear Committee Members,

We appreciate the invitation and opportunity to bid and participate in Idaho's Local Government Cooperative RFP for Winter Maintenance Equipment and Products.

While Kueper is a German made product, we source some components from the USA – our Kueper by Kennametal and KNA brands are made in the USA. Regardless, we are known for selling and representing only premium and high-quality products coupled with what I believe is the best support and service in the winter maintenance industry – whether directly or through our servicing dealers.

Again, we greatly appreciate this invitation and know that we have answered all questions to the very best of our knowledge and ability.

Sincerely,

Gardi Willis

Managing Director & Co-Founder

Kueper North America, LLC

# Kueper North America, LLC Proposal For Local Government Cooperative RFP 23-003 Winter Maintenance Equipment and Products

#### **Company History**

Kueper North America was established over 15 years ago in partnership with Kueper Germany in order to properly import, sell and distribute the Kueper line of plow blades. (Kueper Germany was established over 60 years ago and is the premier leading brand of snowplow blades in the European market.) Prior to this, Gardiner Willis, Co-Founder and Managing Director of Kueper North America, imported and sold the Kueper line of product. Kueper North America now sells our products in 46 States, over 100 airports an several Canadian Provinces. Kueper North America has six salesmen or territory representatives in addition over 15 dealers nationwide. Our warehouse is centrally located in Southeastern Missouri, making distribution to dealers or customers very easy and efficient. Many dealers also maintain significant amounts of stock. Kueper North America is also a Kennametal Strategic Partner and has developed our own branded "KNA" line of USA made carbide blade and scarifier product.

#### **Unique Qualifications**

Kueper has been developing premium snowplow blade technology for more than 60 years. Over that span of time, Kueper has created innovative plow blade solutions for equipment manufactures and for many unique plowing requirements in North America and Europe. Kueper snowplow blades are used for the heaviest snowfall areas, to protect valuable ancient cobblestone streets, and to safely plow airport runways. All of these applications required deep knowledge of snowplow dynamics and plow blade construction.

#### **Experience**

Kueper North America's number one priority is customer satisfaction. Our growth and involvement within the industry speak to this as proof of satisfaction with our products. While we enjoy making sales, we are the first to tell a customer if our products do not suit their operations - and even recommend a competing product. We build relationships with every customer - many we have known for almost two decades in this industry.

Kueper North America's sales staff has a collective 150 years + of experience selling plow blades product to State, Governmental and Municipal agencies of all sizes. Many members of our team have sold other similar municipal equipment to the same customer base in the past where the deliverables were identical: premium quality products that excel at the designed task, sold at fair pricing and supported accordingly. Most of our dealers sell other municipal seasonal

products in their states or territories to the same customers in addition to the Kueper line of snowplow blades.

#### **Product Information/service capability**

- **Product Description** Kueper North America markets and distributes snowplow and grader blades under the brands Kueper, KNA, and Kueper by Kennametal.
  - Kueper brand products and premium blades and accessories manufactured in Germany. All Kueper blades incorporate rubber and hard materials for flexibility, long wear life, excellent cleaning, and low noise and vibration. Tuca SX is a steel/rubber/tungsten carbide blade developed specifically for North American applications. It is known for ultra long wear life and quiet operation. GK5 is a rubber/ceramic blade developed to protect features embedded in the pavement, such as raised pavement markers, decorative pavers, and traffic markings. It also used for safety over manhole rings. CECO is a steel/rubber/ceramic blade developed for sectional snowplows (Schmidt, Wausau, etc.).
  - KNA brand products are plow and grader blades with tungsten carbide inserts.
     KNA blades are manufactured 100% in the USA.
  - Kueper by Kennametal brand products are plow and grader blades with tungsten carbide inserts manufactured Kennametal.
  - Specifications for all products are available upon request.
- Marketing Plan Kueper North America markets our products by direct customer contact, industry trade shows, the kueperblades.com website, direct mail flyers, and our nationwide network of dealers. Specific to this LGC RFP, we will continue to participate in the IAHD Fall Conference, send direct mail flyers, and make direct contact to LGC members.
  - Digital Flyers Attachment "Kueper North America Marketing Digital Flyers"

#### Benefits and Services

- Training Kueper North America offers onsite training and support by our sales staff and dealers. This is standard and there is no cost to the customer. We make presentations to groups of all sizes regarding mounting and what to expect in terms of product performance. We also offer onsite support to assist in setting up customer's equipment with our products and continue support as our products are used. Again, there is no cost for our support. Kueper North America is a company that works as partners with our customers. We have introduced a number of new products that were developed in collaboration with customers to solve their needs. Some of our products are unique in the industry for their specific performance attributes.
- Quality Assurance Kueper brand products are made to the highest of European (German) manufacturing standards and "CE" (European) quality assurances. In our industry these typically meet or exceed quality assurance programs in North America. The products are all hand-made and vulcanized in batches. Kueper is the only blade manufacturer that incorporates a unique, permanent barcode

that contains data on the materials and manufacturing process for each blade piece. Product is inspected after final vulcanization, after paint and logo application and finally upon shipment. Pallets are not only strapped down inside the containers but Kueper also incorporates inflated air bags between the pallets to ensure no product shifts during transport. When received in the warehouse, product is further inspected for any damage and then stored according to category. Both our Kennametal and KNA brands are the only carbide blades and scarifiers to be made 100% in the USA. We control the carbide powder blends, the pressing and sintering of the carbide inserts, the brazing of the inserts in the blades or tips and final paint and palletization. Inserts are pulled from time to time, inspected and tested microscopically and chemically. The complete control over the manufacturing process and the ability to test product components in this manner assures a top quality product.

 Warranties - Kueper will replace any "failed" blade components. We do not expect an exchange but do request that the failed blades be kept for analysis by our dealers and or company representatives. A warranty statement is attached for reference.

#### **Ordering Process & Delivery**

Our orders are typically processed in the following order. Customer will request a quote of product according to the number of blades or plow blade sets to be ordered. Quotes are prepared with the set number of SKU's with shipping and contact information clearly stated. These are generated through our accounting system so once a customer is entered, that data, order and customer information is in our record. Upon customer acceptance, typically we receive a PO or Purchase Order Number and our warehouse is notified. Our pallets are double cross banded while all shipping documentation is printed and attached to each pallet. Customer is then notified of the freight tracking number, expected shipment arrival date and any necessary updates. We use only quality reliable trucking companies. We do not have an online system to place orders. We believe direct contact with customers is the best method to communicate the specific applications for our products and the benefits of our products. High quality direct customer support is one-way Kueper North America differentiates ourselves from competitors.
